

# **EIA General Meeting Minutes May 26, 2014**

## **Schneider Inverter Testing Facility Tour and Dinner Meeting**

3700 Gilmore Way, Burnaby BC

The installation literally took place as each portion of the design was completed. The scheduled completion date was critical to meet the time frame for eligibility for the federal grant provided for research projects. Completion needed to happen by the end of the calendar year. It was completed only hours before the deadline. It was indeed a very co-operative project by all involved.

Those in attendance were split into two groups for the tour. One group was lead by John Vail and the other by Luc Vail of Schneider Electric. Kirby Sewell, owner of Power Pros Electrical, was in attendance along with two of his key people responsible for the installation, Dana MacLean and Kody Saunders. Barry Corsiatto of BLC Engineering was in attendance and was also our conduit to the Schneider facility tour.

A buffet dinner in the Schneider lunchroom was enjoyed by all following the tour. It was moved by Jack Ball and seconded by Nick LeForte that we waive the formal meeting agenda until the next meeting. Carried.

The next dinner meeting is scheduled for September 22, 2014.

Adjournment.
